

REACH – Declaration

Weißensberg, 02.02.2017

tecnotron elektronik gmbh, as a manufacturer of electronic products in terms of REACH, is a so-called „subsequent user“. We provide exclusively non-chemical products. Furthermore the provided products shall not release any substances under normal and reasonably foreseeable terms of use.

Therefore, tecnotron elektronik gmbh is basically neither dutybound to mandatory registration, nor to the obligation to create safety data sheets.

Beyond that, we will inform you immediately according to REACH – art. 33, if any substances of our products (from concentration of > 0.1%) are classified as “of high concern” by European Chemicals Agency (ECHA). Yet, according to the current state of knowledge, we do not assume, that this will happen.

Regardless of these obligations, we intensely pursue the implementation of REACH by our suppliers – in our own interest and to assure high production reliability for our customers. We are in close communication with our suppliers of chemical substances and preparations (e.g. primary, auxiliary and operational material for production and processing or other operational processes) and we will include the pre- and main registration of relevant substances in REACH in our supplier rating.

The management of tecnotron elektronik gmbh
